

GREAT CLEAN ENERGY TECHNOLOGY CAN COME FROM ANYWHERE THAT'S INCLUSIVE INNOVATION

Chain Reaction Innovations is a two-year fellowship for entrepreneurs focusing on energy and science technologies. We practice inclusive innovation.

Through an annual nationwide application call and competition, four to six teams/individuals are selected to join CRI. Using a cohort model, participants get support and encouragement from their peers.

BENEFITS

- Argonne National Laboratory offers you access to state-of-the-art equipment and world-class expertise
- Up to \$220,000 in non-dilutive support for de-risking technical innovations
- Over \$100,000 per year for stipend and benefits, including a travel allowance
- Support obtaining additional funds for tech acceleration
- One-on-one research mentorship by an Argonne scientist you choose
- Advisory network of regional and national business mentors, commercial partners and investors
- Potential collaborations with Argonne's 1600 scientists
